<b>VICTOR LEMOINE</b> — Double. Considered best in its class of lilac colored doubles.	3.50	
<b>VIOLETTA</b> — Double! Carmine purple to magenta.	4.00	

These French named varieties are the showiest of the lilacs. All have been chosen for their good qualities. All are on their own roots and so will do better for you than the grafted stock usually offered. Available in April and October-November when plants are dormant. Dug fresh for each order, none held in storage. F.o.b. Minneapolis.

Plant in a sweet (lime) soil in a sunny location. Fertilize from the top with manure or bone meal. They will grow without attention but a little care will produce handsome results.

We have other varieties in small quantities. White for quotes.
